ADULT

ORAL SEDATION DENTISTRY

3-day course | 25 credit hours

Banish patient fear forever

An astonishing 75% of the population suffers from dental anxiety. Learning sedation dentistry gives you the skills to better the lives of patients with dental phobias. Our Oral Sedation Dentistry course, taught by Anthony S. Feck, DMD and Leslie Fang, MD, PhD, offers everything you need to integrate sedation into your practice. You will study two levels of sedation, nine proven protocols, systems management for your team, and the science behind sedation. You'll also engage in airway management training designed to build your confidence, and view videos of sedation patient experiences demonstrating step-by-step protocols, monitoring, patient assessment, and drug interactions.

- ✓ Learn seven factors you must know to confidently deliver oral sedation dentistry
- ✓ Understand ten crucial skills for communicating with a sedated patient
- ✓ Identify five keys to airway management using hands-on training
- ✓ Discover how to create advanced treatment plans for neglected mouths

PEDIATRIC

ORAL SEDATION DENTISTRY

3-day course | 25 credit hours

Engage in intensive study of SAFE pediatric sedation dentistry

Advances in sedative pharmacotherapeutics and a deeper understanding of patient selection has made pediatric sedation as taught *exclusively* by DOCS Education a **safe** and invaluable service. This course includes **Advanced Pediatric Airway Management (APAM)** instruction with high-fidelity child simulators and a team training breakout session. Reduce stress for your pediatric patients, their parents, and your entire team; treat patients in a single appointment and maximize patient comfort and practice efficiency. Your patients will grow into adulthood with far fewer oral health issues and no fear or anxiety when it comes to seeing a dentist.

- ✓ Learn the single best protocol, step-by-step, for safe pediatric sedation
- ✓ Practice making decisions about sedation dentistry using real-life pediatric case studies
- ✓ Understand the function of all equipment used in the practice of safe sedation, going beyond the standard of care and mandated guidelines
- ✓ Make certain that each and every pediatric patient leaves your office healthier than when they arrived

RECERTIFICATION

ORAL SEDATION DENTISTRY

1-day course | 7.5 credit hours

Dentistry, medicine, science, and pharmacology are continually evolving

As a sedation dentist, your skills require constant renewal to ensure you're providing patients with the best care possible. Maintaining and growing the skills you learned in Oral Sedation Dentistry is simple with our one-day refresher course. We recommend attending this course - taught by Anthony S. Feck, DMD, Dianne Benedictson, DDS, and Jerome Wellbrock, DMD, MAGD - at least once every two years.

- ✓ Learn about the latest developments in oral sedation protocols and pharmacology
- ✓ Review airway management and patient assessment techniques that will help keep your patients safe
- ✓ Examine pharmacokinetics and pharmacodynamics to help you choose the best drug(s) and protocols for each patient
- ✓ Understand methods to increase or decrease sedation levels

EMERGENCY

DALS® (ACLS FOR DENTISTS)

2-day course | 15 credit hours

The Emergency Response Course Every Dentist Must Take

Are you prepared to handle a medical emergency in your office? This in-depth, intensive class provides you the critical skills required to respond to respiratory failure, airway obstruction, cardiac problems, and anaphylaxis. Using high-tech patient simulators, this ACLS course is exclusively designed for dental offices and ensures a 100% American Heart Association pass rate. Eliminate the 'fright' from medical emergencies.

- ✓ Course materials are understandable and taught without boring monologues
- ✓ Learn to create an emergency medical plan for your office
- ✓ Correctly assess the patient and recognize a medical emergency
- ✓ Select the correct AHA algorithm for each emergency
- ✓ Build an effective, in-office code team
- ✓ Know what to expect, and how to pass, the AHA's 50-question certification test

ADVANCED SEDATION

MASTER SERIES

2-day course | 15 credit hours

Expand your patient base and broaden your knowledge

Individuals suffering from chronic medical problems are one of the fastest-growing segments of the patient population. These patients benefit from sedation dentistry, as it is the safest and least stressful way to receive care. Participate in Advanced Sedation, presented by world-renowned doctors Anthony S. Feck and Leslie Fang, and learn to safely manage sedation appointments of ASA III+ patients with asthma, diabetes, bleeding disorders, and other medical issues in this two-day intensive didactic and hands-on program with simulations!

February 23-24

Doctor.....	\$2,297
DOCS Member.....	\$2,083
Team (per person).....	\$639

Prerequisite: Oral Sedation Dentistry or Current Sedation Permit

This course is designed for doctors who have completed a minimum of 50 sedation cases and are interested in reaching a larger patient base.

Learn Critical Facts on Next-Generation Medications:

- ✓ New anticoagulants beyond Coumadin
- ✓ New antiplatelets beyond Plavix
- ✓ New bisphosphonate/osteonecrosis of the jaw guidelines
- ✓ New metformin guidelines for type 2 diabetes
- ✓ New guidelines on hypertension, joint replacement, and pre-medication
- ✓ Participate in one-on-one emergency training using SimMan®
